

# Nasir Shahzad

## Senior Software Engineer (Backend-Focused Full Stack)

**Email:** [nasirshahzad.dev@gmail.com](mailto:nasirshahzad.dev@gmail.com) | **Phone:** +923338152157

**LinkedIn:** [www.linkedin.com/in/nasir-shahzad-525110210/](https://www.linkedin.com/in/nasir-shahzad-525110210/) | **Address:** Lahore, Pakistan

**Portfolio:** [https://nasirshahzaddev.github.io/my\\_portfolio/](https://nasirshahzaddev.github.io/my_portfolio/)

### PROFESSIONAL SUMMARY:

Senior Backend Software Engineer with 4+ years of professional experience and 1+ year of freelance full-stack development experience building scalable SaaS, ERP, and healthcare systems using Node.js, NestJS, PostgreSQL, and MongoDB. Specialized in designing multi-tenant distributed systems, secure RBAC-based authorization models, and high-performance backend services. Strong expertise in system design and distributed systems, API development, database optimization, and building production-grade cloud-native applications on AWS. Experienced in improving system scalability, reducing latency, and implementing event-driven and microservice-based architectures for complex enterprise workflows.

### TECHNICAL SKILLS:

**Languages:** JavaScript, TypeScript

**Frontend:** React, HTML5, CSS3, Tailwind CSS

**Backend:** Node.js, NestJS, Express.js

**Databases & ORM:** PostgreSQL, MongoDB, Prisma, TypeORM

**Architecture:** REST APIs, Microservices, Monolith, Monorepo, gRPC

**Messaging:** RabbitMQ, WebSockets, Socket.IO

**Performance:** Redis, Caching, Job Queues, Query Optimization, Indexing

**Cloud & DevOps:** AWS, Lambda, Webhooks, Cron Jobs

**Tools:** Git, GitHub, SonarQube, Jira, ClickUp, Slack, Discord

**System Design:** Scalable Architectures, Distributed Systems, Multi-Tenant Systems, High Availability Systems

### PROFESSIONAL EXPERIENCE:

#### **Senior Software Engineer**

**Malind Tech** - Lahore, Pakistan (Onsite)

*April 2026 - Present*

- Leading backend development for SaaS and ERP platforms using NestJS, PostgreSQL, Prisma, and AWS
- Designing scalable system architecture, APIs, and database models for enterprise workflows
- Driving technical decisions, code quality, and backend engineering standards
- Collaborating with stakeholders to translate business requirements into scalable solutions
- Mentoring engineers and participating in architecture design and reviews
- Contributing to React and TypeScript-based frontend modules for enterprise SaaS and ERP applications.

#### **Software Engineer**

**Brackets Private Limited** - Lahore, Pakistan (Onsite)

*October 2022 - March 2026*

- Developed scalable backend services using Node.js and NestJS for SaaS and healthcare platforms.
- Designed and implemented REST APIs using MongoDB and PostgreSQL, ensuring reliability and maintainability.
- Built multi-tenant architecture with tenant isolation, domain-based tenant resolution, and dynamic role-based access control.
- Developed a reusable audit logging system for tracking entity-level changes across platform modules.
- Optimized system performance through Redis caching, database indexing, and query

- optimization, improving API response times by 30–40%.
- Built event-driven workflows and AWS Lambda-based serverless pipelines for asynchronous processing and improved scalability.
- Implemented secure authentication and RBAC-based authorization systems for controlled access to sensitive data.
- Developed unit and integration tests to improve system reliability and maintain code quality.
- Collaborated with product managers, frontend developers, and QA teams to deliver scalable backend features.
- Mentored junior developers and participated in code reviews to maintain engineering standards.

## ***Freelance Full Stack Developer***

### **Self-Employed | Remote**

*Feb 2021 – Mar 2022*

- Developed web applications for international clients using Node.js, Express.js, React, MongoDB, and PostgreSQL.
- Designed and implemented REST APIs, authentication systems, and database schemas for custom business solutions.
- Collaborated directly with clients to gather requirements, define project scope, and deliver production-ready applications.
- Built responsive frontend interfaces and integrated them with scalable backend services.
- Managed project delivery, testing, deployment, and ongoing maintenance.

## **KEY PROJECTS:**

### **ERP (Enterprise Resource Planning Platform) | Multi-Tenant (Schema-Based Tenant Isolation)**

*NestJS, NodeJS, Prisma, PostgreSQL, Typescript*

- Built a modular ERP platform covering procurement, inventory, vendor management, warehouses, and approval workflows.
- Implemented RBAC, audit logging, and scalable REST APIs for enterprise operations.
- Designed optimized database schemas and transactional workflows for high-volume business processes.

### **Cairasu (Home Care) | Multi-Tenant Caregiver Marketplace**

*NestJS, NodeJS, MongoDB, Redis, REST APIs, AWS*

- Designed multi-tenant architecture with tenant isolation and domain-based tenant resolution.
- Implemented dynamic RBAC and permission management for multiple organizations.
- Developed scalable backend services for caregiver onboarding, service management, and marketplace operations.

### **Healthcare Compliance Platform**

*NestJS, NodeJS, MongoDB, PostgreSQL, AWS, Microservices*

- Developed backend services for monitoring healthcare compliance and regulatory requirements.
- Implemented secure APIs and RBAC-based authorization for sensitive healthcare data.
- Built workflow automation and compliance tracking features across distributed services.

### **Business Process Automation Platform**

*NodeJS, ExpressJS, MongoDB, PostgreSQL, AWS, Monolith*

- Developed backend services for expense management, audits, payroll, client management, and internal documentation.
- Designed modular APIs to automate business workflows across multiple departments.
- Optimized database operations and reporting workflows for high-volume transactional data.

### **SOAP Notes Generation Platform**

*NodeJS, NestJS, AWS Transcribe, AWS Lambda, PostgreSQL, REST APIs*

- Built a serverless pipeline that converted doctor-patient audio recordings into structured SOAP notes.
- Integrated AWS Transcribe and Lambda to support asynchronous transcription workflows.
- Designed scalable background processing systems for handling large volumes of medical recordings.

## **EDUCATION:**

**M.Phil, Software Engineering** – University of Lahore

**M.Sc, Information Technology** – University of Sargodha

## **CERTIFICATIONS:**

- Scrum Fundamentals Certified (SFC™)
- AWS Cloud Practitioner Essentials
- Developing Back-End Apps with NodeJS and Express (IBM)
- Managing Project Risks and Changes (University of California, Irvine)
- Fundamentals of NestJS
